calyx framework

FULLY-MANAGED IT-AS-A-SERVICE

Say goodbye to yesterday's hassles.

It's time to shift to a better technology experience.

Calyx Framework brings teams together in a fully managed, cloud-based environment where they can work with less risk, hassle and disruption. It adds up to a new level of business agility — and a serious competitive edge.
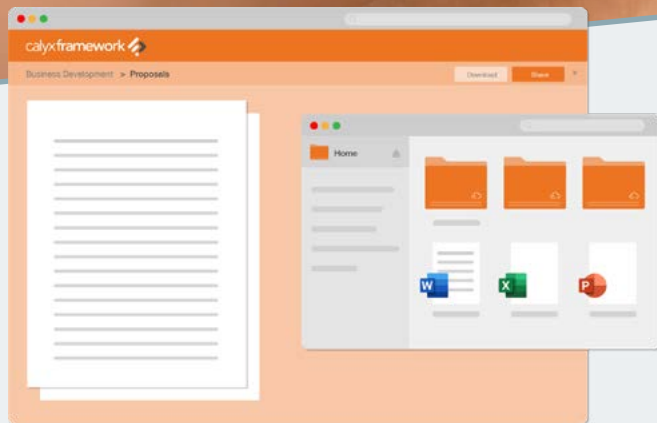

## Applications and data protected by enterprise security technologies

- Our best practice, layered approach to security is second to none.
- Eliminate risk with locked-down network, resources and data protection.
- Redundant, enterprise grade security appliances and auditable security controls for all aspects of Calyx Framework.

Built-in backup, disaster recovery and business continuity

- Maintain business continuity with less downtime and disruption.
- All data and applications are automatically backed up within Framework.
- Backups are independently monitored and audited for transparency.

calyx framework

FULLY-MANAGED IT-AS-A-SERVICE
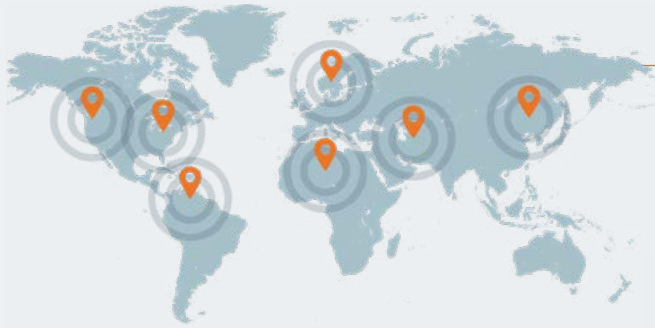

Anywhere availability

- Consistent experience regardless of device
- Highly secure connectivity from any network
- Session roaming lets you pick up where you left off

Be scalable and future ready

Learn more from the people who use the technology in your business through employee interviews, surveys and input.

Updates, software and changes published to all users simultaneously

- All users work on the same version.
- New applications are installed instantly.
- Enjoy easy management of complex configurations.

Fully managed, exceptional Calyx support

No self-administration required. Calyx handles monitoring, maintenance, proactive troubleshooting, predictive failures and replacement of hardware before a failure occurs.
